

First Harmful Event - Collision with Tree-like Fixed Object
(excludes major roads)

Mailbox - 19
Traffic sign support - 39
Utility pole/Light support - 32
Tree (Standing) - 27 (7 were at intersections)

NOTE: This data is from the MDT accident database, which has information on the 5,246 reported accidents in Helena between January 1, 2011 and December 31, 2015. There were 117 collisions with tree-like objects. Three tree accidents not plotted due to ambiguity in the record. An additional 28 accidents with otherwise unidentified "Other post, pole, or support" are not plotted; neither are collisions with other types of fixed objects. Most collisions are not with fixed objects; for instance, there were 360 collisions with parked cars on local streets. Collisions with tree-like objects on boulevard tree streets are circled in red. Data on major roads was excluded because of high traffic volume and number of collisions on those roads. Major roads include I-15, Hwy 12 corridor, N. Montana, Custer, Cedar, and Last Chance Gulch north of Lyndale.
